

# WEBCTRL® CLOUD

## RELEASE NOTES

- DATE: JULY 21, 2025
- VERSION: 2025-Q1-SR24

Automated  
Logic

## WHAT'S NEW IN WEBCTRL® CLOUD?

### BAS CENTRAL:

BAS Central is a cloud-native platform that allows our partners to manage their licenses, customers, and BAS sites at a portfolio level. Updates include the ability to see controller inventory and server information for Cloud-connected sites.

### TRAILGUIDE:

TrailGuide provides an innovative troubleshooting and navigation experience that enables a user to quickly identify the cause of a system problem. TrailGuide displays the relationships between building systems, along with critical information about those systems. The user can seamlessly pivot to explore each relationship present for a given node (such as mechanical heating or cooling source, network, or demand source) to determine the most likely cause of an issue based on key performance indicators displayed in the context of the relationships shown.

### ACCELERATE V3:

- All-new UI
- Record of historical equipment tests
- Automated fan control during testing of fan-powered VAV boxes
- New options for equipment detection & test configuration
- Overhauled reports logs & improved error diagnosis
- Bug fixes & optimization

### IMPROVED BACNET DISCOVERY:

- Initiate BACnet discovery on any network connection
- Discover devices using device name or MAC address
- Discover multiple devices by a range of MAC addresses
- Show real hierarchy of discovered devices

### TOOL ENHANCEMENTS:

- Spell check added to SiteBuilder
- Spell check added to ViewBuilder
- Zoom added to SiteBuilder
- Zoom added to ViewBuilder
- Ability to open a Graphics Markup file in ViewBuilder for associations

### SECURITY ENHANCEMENTS:

- Updates to numerous add-ons to improve security
- Updated other components to strengthen product security

### MISCELLANEOUS ENHANCEMENTS:

- Scatterplot Trends (VIZ) built into WebCTRL by default
